Today Nekki announced a global release date for Shadow Fight 3: The third part of the popular fighting RPG franchise is scheduled for a worldwide release for Android and iOS on November 16, 2017.

For the first time in the franchise's history the third part provides a full 3D experience - but still saves the authenticity and smoothness of character animations and the precise fighting style of the original Shadow Fight games.

The epic single-player campaign of Shadow Fight 3 introduces an exciting new storyline in the Shadow Fight universe, which will be witnessed and told by the heroes of three competing factions: Heralds, Legion and Dynasty.

In addition to the dramatically improved graphics, Shadow Fight 3 will also evolve the core gameplay to a higher level. Shadow Fight 3 will allow its players to master 3 unique and distinct fighting styles. Each style has its own set of moves and deadly combos. Players will be able to choose if they want to stick to one style or mix different moves, gear and weapons of different factions to create their own „hybrid“ fighting style!

Nekki also announced a new premium edition of the game's popular predecessor, Shadow Fight 2, which was installed on more than 300 million mobile devices all around the world as a Free-2-play version.

The „Shadow Fight 2 - Special Edition“ is scheduled for release during August. For a yet undisclosed price point the Special Edition will allow its players to discover the Shadow Fight universe in an easier way - with optional in-app-purchases, but free of advertising.
